

# Success Cases

## MULTIPLATFORM COMMUNICATION

A single, powerful app for calling, messaging, conferencing and collaboration, delivers a multi-device experience that works on a **browser, mobile device and room-based system and also desktop**. Development of a single platform supporting all the different modes of High-scale audio conferencing. Extensive web collaboration, rich multi-vendor HD video, in an all-in-one software solution.

**Google Play and App Store final deployment, tracking performance, user comments, and qualification.**
